

Designa CONNECT DIB 600 PREMIUM

Digital Information Boards – presented to perfection

The use of high-quality digital information boards in parking management offers the opportunity to display targeted digital content such as promotional videos, information on current rates, or welcome messages that include the recognised license plate. In this way, digital media content is delivered to parking customers in a personalised manner. The parking customer is informed at any time!

The Designa DIB 600 PREMIUM combines technology and sophisticated design in a high-quality all-in-one solution. The steel provides optimum protection for the fully integrated technology. As a combination of display and steel, the DIB 600 PREMIUM impresses with its outstanding appearance and versatile applications and is also a high-quality eye-catcher for your parking lot!

FEATURES

- Flexible presentation of individual video content, e. g. advertising for own parking products (e.g. monthly parkers)
- Display of parking-related data, also in combination with advertising
- Plug&Play functionality between the display, content (MCC) and Designa parking control software
- Directly visible information or advertising content through external installation with large displays
- Reduced installation work for quick commissioning
- Sturdy and weather-resistant construction made of Stainless Steel
- Optimal protection of the control unit against temperature fluctuations, moisture, dust and tampering

VIEW VARIANTS

- Advertising display over the entire screen
- Dynamic display divided into three parts
- Display green arrow/red cross for indication of the availability of the lane (entrance/exit free or out of service/ lane blocked)
- Tariff & Availability Display: Maximum transparency through the option to configure real-time availability or tariffs.
- Personalized service: Greeting and farewell with license plate recognition for transient parkers, monthly parkers and value cards.
- Focus on e-mobility: Targeted communication through specific adverts and copy for electric vehicles.
- Partner integration: Customized screens featuring partner logos (e.g. EasyPark) and entry confirmation.
- Smart Exception Handling: Proactive notifications for monthly parkers in special cases (e.g. entering as a transient parker).

ADVANTAGES

- Increase in customer experience
- Parking information and advertising at a glance
- Visual highlight and eye-catcher for the parking lot
- Attractive design of the highest quality
- Suitable for all systems: ticket-based system, free-flow, ticketless system and hybrid mode
- Attractive advertising space for your own parking lot or for business partners and thus additional revenue

COMPONENTS

- TFT color display 46"
- Media Content Computer (MCC)
- Stele

INTEGRATION AND CONNECTION

- Automatic installation of the Player Unit (MCC) via a DHCP server in the Designa system
- The display is connected via HDMI

DESIGN

- TFT color display (46"), 1920x1080 Pixel, 120 Hz
- Stainless steel stele in RAL 7012 (basalt grey)
- Dimensions (HxWxD): 1800x680x190 mm
- Weight:
Stele: approx. 66 lbs. (30 kg)
Display: approx. 62 lbs. (28 kg)
Total: approx. 128 lbs. (58 kg)
- Ingress Protection Rating: IP 54

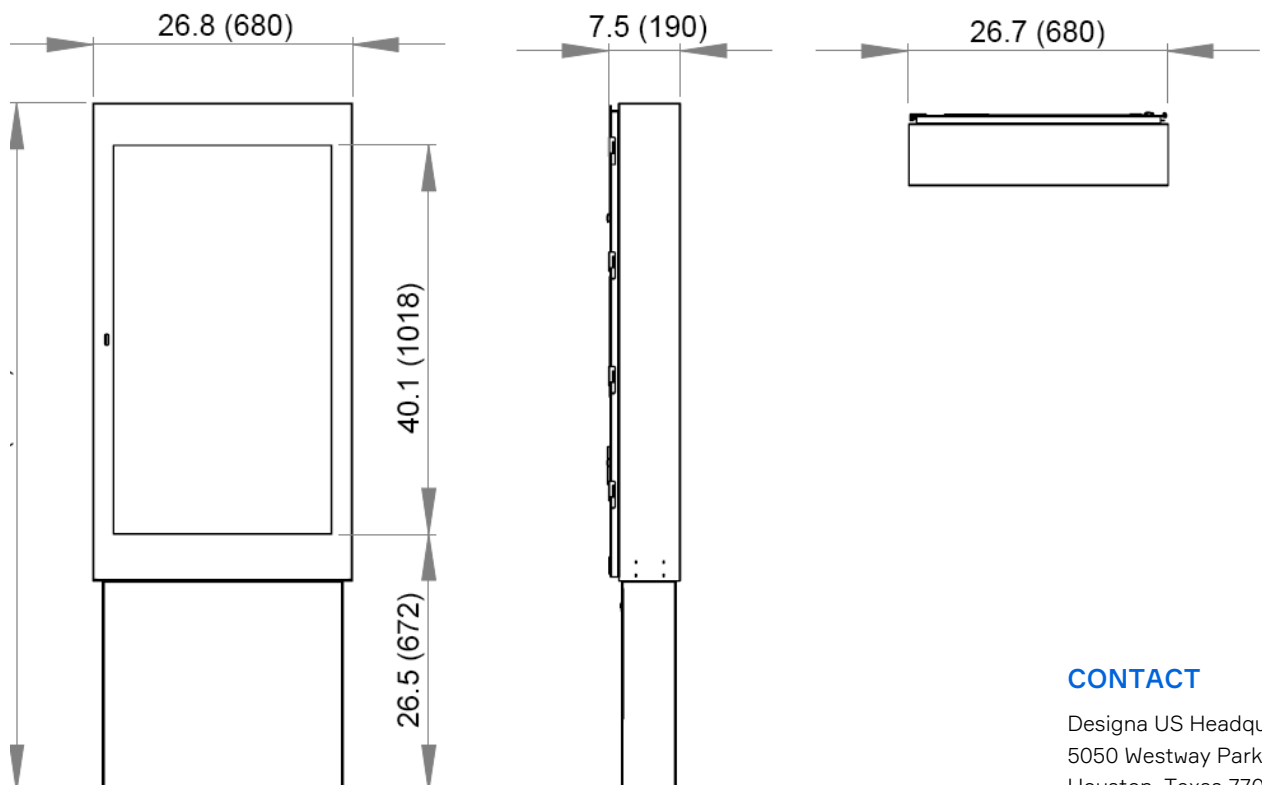

TECHNICAL DATA

- Input voltage: 120 V AC, 60 Hz
- Output voltage: 120 V
- Input current:
Operation 1.3 A, max. 2.4 A, standby 0,05 A
- Power consumption:
Operation 156 W, max 288 W, standby.6 W
- Max. wire size: AWG 14 Protection class: I
- Control voltage: 5 V
- Type of connection: Tension Spring connection
- Display Brightness: 3500 cd/m² (Peak 4000 cd/m²)

SYSTEM REQUIREMENTS

- Media files: H264 Codec (e. g. mp4 files)
- Video format: 1080 x 1920 Pixel (Portrait format)
- Designa ELEMENTS SOFTWARE ADD-ON DIGITAL SIGNAGE
- System version X24.4 onwards
