

Designa ELEMENTS SOFTWARE – ADD-ON PAY-IN-LANE

Software ADD-ON for credit card payment at the exit

With the ELEMENTS SOFTWARE ADD-ON PAY-IN-LANE, you can expand your system to include the option of conveniently paying for parking via credit card at the Exit Control Terminal or in advance at a DESIGNA EVENT TERMINAL.

In addition, non-registered short-term parkers can use your parking space completely without a paper ticket by using their credit card at both Entrance Control Terminals and Exit Control Terminals. This not only has the benefit of avoiding queues at the pay stations, but also minimises the consumption of paper tickets and the associated costs, thus enabling your customers to use parking spaces even more attractively.

FEATURES

- Credit card payment at the exit control terminal
- Pre-payment by credit card at the DESIGNA EVENT TERMINAL
- Fully ticketless use of car parks by using a credit card at Entrance Control Terminals and Exit Control Terminals
- Reduction of paper ticket consumption and related costs

FUNCTIONS

Credit card payment at the exit control terminal

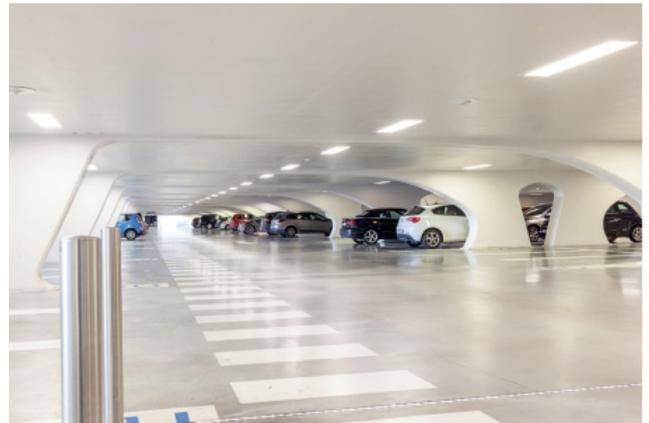

Payment can be made by credit card when leaving the car park, instead of paying at the pay station.

Pre-payment at the entrance control terminal

Parking can be paid for in advance by credit card at a DESIGNA EVENT TERMINAL.

Ticketless entry and exit by credit card

Non-registered short-term parkers can enter and exit the car park fully ticketless by using a credit card at the entrance control terminal and exit control terminal.
